

Care and Health Information Exchange

The Care and Health Information Exchange (CHIE) is a secure system which enables health and social care professionals across Hampshire, the Isle of Wight and surrounding areas to see the shared patient record.

Patient Rights

Under the General Data Protection Regulations (GDPR) patients have the right to opt out. Patients can **either** opt out of:

- CHIE, in which case their data will not be used for their care or for health planning and research
- CHIA only, in which case their data **will** be available for their care but will not be de-identified and used for analysis.

CHIE

The Care and Health Information Exchange (CHIE) is a secure system which shares health and social care information from GP surgeries, hospitals, community and mental health, social services and others. CHIE helps professionals across Hampshire, the Isle of Wight and surrounding areas provide safer and faster treatment for patients. If your practice has signed up to share patient data to CHIE, coded data for your registered patients is fed to CHIE on a daily basis. To protect patient privacy and confidentiality, only health and social care professionals who are involved in the care of that patient are allowed access to CHIE.

CHIA

The information that your organisation provides is also used to improve future care for patients. This helps plan NHS services and supports medical research. To keep your information safe it is moved to a separate database called 'Care and Health Information Analytics' (CHIA) and changed so that it cannot be used to identify any individual patient. Data is never shared for the benefit of commercial companies like drug manufacturers. People who analyse data on CHIA do not have access to CHIE, so cannot identify them.

How patients can opt out

If patients are thinking of opting out they are Encouraged discuss this with their GP practice. If they decide to go ahead, the GP practice should record this on the GP clinical system. The presence of these codes determines whether that patient's information will be visible in CHIE or CHIA.

Managing Patients who want to opt-out of both CHIE and CHIA

Please apply the relevant code to the patient's clinical record to ensure that they are opted out of record sharing to both CHIE and CHIA:

Read Code (v2):

93C1. Refused consent for upload to local shared electronic record

CTV3 Code:

XaKRw Refused consent for upload to local shared electronic record

Opting back in to CHIE and CHIA

If a patient requests to opt back in to CHIE and CHIA, their data will become part of the nightly data feed from your practice and their CHIE record will be rebuilt. Please apply the relevant code to the patient's clinical record to ensure that they are opted back in to record sharing to CHIE and CHIA:

Read Code (v2):

93C0. Consent given for upload to local shared electronic record

CTV3 Code:

XaKRv Consent given for upload to local shared electronic

record.

Managing Patients who want to opt-out of CHIA only

Please apply the relevant code to the patient's clinical record to ensure that they are opted in to record sharing to CHIE but opted out of record sharing to CHIA:

Read Code (v2):

9Nu0. Dissent from secondary use of general practitioner patient identifiable data

CTV3 Code:

XaZ89 Dissent from secondary use of general practitioner patient identifiable data

Opting back in to CHIA

If a patient requests to opt back in to CHIA, their record will become part of the copy of data shared to CHIA. please apply the relevant code to the patient's clinical record to ensure that they are opted back in to record sharing to CHIE and CHIA:

Read Code (v2):

9Nu1. Dissent withdrawn for secondary use of general practitioner patient identifiable data

CTV3 Code:

XaZ8A Dissent withdrawn for secondary use of general practitioner patient identifiable data
